

Kentucky Crosswords Presents:

"Day of the Fox Logic Question"

Answer Me This:

Jean took her husband Bob to a cabin in the mountains for a seven-day retreat. Each day they were there, including when they arrived on Saturday, they saw a different animal.

One day they saw a fox.

Late in the evening the day before they saw the fox, they were sitting on the front porch of the cabin and watched a squirrel playing in a tree nearby.

On Thursday, when they woke up, there was a deer grazing on shrubs in the back yard.

On the fifth day they spotted an eagle overhead while swimming in a mountain stream. Later in the week, while swimming again, they spotted a snake in the same water they were in.

While hiking they came across a turtle one day and a rabbit the next, but those were both before the fox.

What day did they see the fox?
